## HMB™ MUZZLE BRAKE PRODUCT MANUAL

### MAJOR FEATURES

- Reduces recoil and muzzle movements
- CNC machined from high-grade steel
- Black oxide or satin finish

### INSTALLATION INSTRUCTIONS

Depending on firing schedule, a high temperature or ultra-high temperature thread locking compound may be used on the muzzle threads only.

1. Remove any existing muzzle device and/or shims or washers.
2. Clean the barrel thread as recommended by the firearm manufacturer.
3. Hand tighten the brake until it stops onto the barrel shoulder, make sure it is firmly tightened.

## SAFETY FIRST

REV-00

**ALWAYS KEEP THE GUN  
POINTED IN A SAFE DIRECTION**

**ALWAYS KEEP YOUR FINGER OFF THE TRIGGER  
UNTIL READY TO SHOOT**

**ALWAYS KEEP THE GUN UNLOADED  
UNTIL READY TO USE**

### WARNING

Never install this device on a firearm of a caliber other than the one intended.

This device operates by redirecting high-pressure gases at the muzzle. As a result, sound levels are significantly increased and debris, gas and propellant particles can be propelled back toward the shooter or nearby observers.

Eye and ear protection must be worn at all times when shooting or observing.

This device must be free of any obstruction before shooting.

Check device tightening before any use.

If this device becomes loose during use, stop shooting, immediately unload the firearm and repeat the installation procedure before operating the firearm again.
