

2024 PRODUCT CATALOG

OUR COMPANY

Audere is a Latin word which means “to dare” and is the foundational principle of this company based in San Marino, where it has been established in 2017 as a manufacturer of firearm accessories. Whilst design, engineering and manufacturing of branded product series is its core business, Audere built up a considerable portfolio of customers as an OEM, including major operators of the arms industry, in less than two years. Thanks to its multidisciplinary team of professionals from both mechanical and firearm fields, the company is able to follow products development during

its entire process, in compliance with project requirements. Currently, main product series include optic mounts, rail systems and muzzle devices, nevertheless the R&D department is continuously focused on progress, designing and prototyping future series by means of latest technologies. Audere’s customer base comprises a broad spectrum of users coming from military forces, law enforcement, shooting sports and hunting. Customer service monitors users’ feedbacks in order to constantly improve its own competencies and collect valuable information for other departments.

OUR VISION

The redefinition of weapon improvement.

OUR MISSION

- To impose the Audere brand as a major manufacturer in the market of firearm accessories
- To be a reliable partner for best operators of the arms industry
- To improve existing standards via advancements from other sectors
- To create a solid network of local suppliers, contributing to their growth
- To add prestige to the Italian quality and consolidate “Made in Italy” worldwide
- To advise and educate customer base by means of events and activities

ADVERSUS™

MILITARY

LAW
ENFORCEMENT

SHOOTING
SPORTS

HUNTING

The Adversus™ series, compatible with any 1913 or NATO rail, is optimized for its use on sniper rifle platforms and target users from military forces, law enforcement and shooting sports. The ScopeLink™ interfaces, situated all over the base and caps, make it acts as a modular system configurable by attaching multiple optical accessories. Each part is CNC machined from a single piece of 7075 aluminium, this allows us to keep tolerances which guarantee the best return to zero. Their design ensures required system's pressure and stability in all conditions to prevent any shift of the scope, without provoking its deformation or damage.

- *Extremely solid and durable mounts*
- *ScopeLink™ interface for attaching optical accessories*
- *Designed to maximize zero repeatability*
- *Compatible with any 1913 or NATO rail*
- *Manufactured from 7075-T651 aluminium*
- *Finished with Type 3 Hardcoat anodizing*

LEVITAS™

The Levitas™ is a multi-purpose scope attachment ideal for auto and semi-auto rifles. Its compactness allows a wide range of mounting options. Despite its lightness, the mount can withstand the severest calibers thanks to a new, sturdy clamping system. The mount also features our proven ScopeLink™ interface that allows the mounting of back-up sights both at the top and at 45 degrees, maintaining reduced dimensions. The level vial and 20MOA tilting options make it suitable for long range applications.

- Sturdy, lightweight cantilever mounts
- Four ScopeLink™ interfaces for attaching optical accessories
- Compatible with any 1913 or NATO rail
- Manufactured from 7075-T651 aluminium
- Finished with Type 3 Hardcoat anodizing

JW

The JW Tactical Breacher is a cylindrical choke tube suited for CQB. Its ported section extends 51mm beyond the muzzle in order to manage overpressure. This device can be used with all shot shells including lead, steel and slugs. Manufactured from 17-4PH (AISI 630) heat treated (H1150D) stainless steel and finished with Dark Gray PVD, it ensures top corrosion resistance.

- Manufactured from 17-4PH H1150D stainless steel
